#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 8, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujimoto et al. (U.S. Patent No. 6,473,206).

Regarding claim 1, Fujimoto et al. discloses a scanner, comprising: a housing (10); a carriage (20) which is movable inside the housing; and a triggering section (60) situated on the carriage (20) (col. 5, lines 14-67). Fujimoto does not explicitly disclose a key section to press down for the scanning operation, however, this feature is well known and routinely implemented in the art. Therefore, it would have been obvious to a person of an ordinary skill in the art at the time the invention was made to install start button on the enclosure of the scanner in order to activate motor 60 for starting scanning operation.

Regarding claim 8, Fujimoto does not disclose a key section with a rod to move inside the panel. However, this feature is well known and routinely implemented in the art. Therefore, it would have been obvious to a person of an ordinary skill in the art at the time the invention was made to install such start button on the enclosure of the scanner in order to activate the scanning operation.

Regarding claims 9 and 10, arguments analogous to those presented for claim 8 are applicable to claims 9 and 10.

Application/Control Number: 09/973,075

Art Unit: 2622

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fujimoto et al. (U.S. Patent No. 6,473,206), and further in view of Kokai (JP Patent Application No. 55[1980]-114070).

Regarding claim 14, Kokai discloses an apparatus with sensors 32 and 33 and the two elements on the carriage (22) for triggering the operation of the scanner. Therefore, it would have been obvious to a person of an ordinary skill in the art at the time the invention was made to Combine Fujimoto's design with that of Kokai for added feature for operation of the scanning device.

## Allowable Subject Matter

Claims 2-7 and 11-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## **Contact Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Houshang Safaipour whose telephone number is (571)272-7412. The examiner can normally be reached on Mon.-Thurs. from 6:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L Coles, Sr. can be reached on (571)272-7402. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 09/973,075
